Rankings of Economics Journals

Explanations of columns:

Column 1 - Blue Ribbon Journals

The "blue ribbon" journals are defined in Conroy and Dusansky, *Journal of Economic Literature* December 1995, Volume: 33 , Issue: 4 , Pages: 1966-1971, and Dusansky and Vernon, "Rankings of US Economics Departments", *Journal of Economic Perspectives*, Vol. 12 (1), 1998, 157-170.

Links:

<http://www.e-jel.org/archive/dec1995/Conroy.pdf> (JEL paper)

Column 2 - Diamond List Journals

The Diamond List Journals are those of Art Diamond, "The Core Journals of Economics", *Current Contents*, Vol 1, 1989, 4-11.

Links:

<http://cba.unomaha.edu/faculty/adiamond/web/diahompg.htm> (Art Diamond's home page)

<http://cba.unomaha.edu/faculty/adiamond/web/DiamondPDFs/CoreJournalsEcon.pdf> (Paper)

Column 3 - ALBA Euro Rank

Taken from "Diversity in Economics: An Analysis of Journal Perceptions", *Journal of the European Economic Association*, 1 (6), pp. 1402-1423, 2003 by Axarloglou, and Theoharakis, of the Athens Laboratory for Business Administration). The ranking is based on a survey of opinions of academic economists. The ranking given is the one from European economists.

Links:

<http://www.alba.edu.gr/survey/Ajqp/> (Survey home page)

http://www.wiwi.hu-berlin.de/wpol/html/info/Axarloglou_Theoharkakis.pdf (Paper)

Column 4 - BBS Rank

Taken from the rankings produced by the Bristol Business School. The ranking was produced after iteration taking the opinions of Business School Deans in the UK.

Links:

<http://www.uwe.ac.uk/bbs/research/journsub.pdf> (BBS list)

<http://www.uwe.ac.uk/bbs/research/jlists.shtml> (BBS ranking web page).

Column 5 - Bauwens' Rank 2003

Based on the ISI *Journal of Citations Report* it follows the procedure of Bauwens and multiplies the **impact factor** by the **total number of citations** for each journal.

The **total number of citations** associated to a journal X is the number of times all articles published in that journal have been cited in articles in all journals. It can be seen as a measure of the long run standing of a journal.

The **impact factor** of the journal X for year YYYY is the number of citations of articles published in the two previous years in X, divided by the total number of articles published in the two previous years in X. It is thus an average measure of the frequency at which an article of the journal has been cited in a particular year. It can be interpreted as a measure of the recent relevance or influence of the articles published in the journal.

The **Bauwens rank** by taking the product of the two measures (citations and impact factors), is argued to take account of both the long run standing and the recent impact of the journal.

Bauwens' Rank 2003 uses only information from the 2003 report. An average of the previous 5-10 years would produce a better ranking.

Links:

<http://wos.mimas.ac.uk/> (Web of Knowledge home page)

<http://www.core.ucl.ac.be/econometrics/Bauwens/rankings/rankings.htm> (Bauwens' webpage)

Column 6 - KMS Rank

Based on Kalaitzidakis Mamuneas and Stengos "Rankings of Academic Journals and Institutions in Economics." Journal of the European Economic Association 1(6) (December 2003): pp1346-1366.

Links:

<http://www.le.ac.uk/economics/research/rankings/earank.pdf> (Paper)

<http://www.le.ac.uk/economics/research/rankings/> (Spreadsheets)

Column 7 - Number of Items in RAE 2001

Simply the number of times a journal appeared in the return to the Economics and Econometrics panel of RAE 2001. It will include the same article more than once if the same article was submitted from different institutions. This does not give a ranking of journals but does give some indication of how quality might have been perceived to be likely to be judged.

Links:

<http://www.hero.ac.uk/rae/Results/> (RAE 2001 Results)

Column 8 - Keele Rank

A subjective ranking produced by the Research Committee of the Department of Economics at Keele University. The purpose of the ranking is to provide a resource for staff and to guide RAE returns. The categories and the approximate proportion in each category are:

4*	"world leading"	(5%)
3*	"internationally excellent"	(25%)
2*	"internationally recognised"	(35%)
1*	"nationally recognised"	(35%)
